DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 29, 2004 has been entered.

Allowable Subject Matter

Claims 1-9 are allowed.

The following is an examiner's statement of reasons for allowance:

Applicant argues that the prior art fails to teach the electrostatic deflection of charged solder droplets in two dimensions in order to raster scan a stationary substrate. Examiner agrees. Although Watts, Jr. teaches deflection in one dimension, it is the position of the examiner that this does not make obvious the method of deflection in two dimensions, which, among other things, would require additional deflection plates that are controlled separately, and in a different manner, than the plates of Watts, Jr.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should

preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
